To,

Principle Sir,  
Late.Narayanrao Kale Smruti Model College, Karanja(Ghadge)

Greetings from Naandi Foundation - Mahindra Pride Classroom!  
Please find details of the **Agri-skilling Course in Regenerative Agriculture** below.

Mahindra Pride Classroom (MPC) is a youth livelihood training initiative of the Naandi Foundation. Naandi Foundation is one of India's largest organisations in the social development sector working towards poverty alleviation since 1998. MPC is a flagship Corporate Social Responsibility (CSR) Livelihood program of the Mahindra and Mahindra group, implemented by Naandi Foundation. Flagged off in the year 2016 to enhance the employability quotient of students, with a focus on rural youth, MPC has till date trained over 3,00,000+ youth through 6000+ classrooms across select Universities, Colleges, Polytechnics and ITIs in 19 states across India for free.

MPC's modular training program in life, language, and aptitude skills is designed for students enrolled in government/government-aided vocational colleges and institutions. Under the programme, the institution is required to provide space and 40 hours of their academic timetable to the MPC team which is utilized towards imparting critical skills to the students boosting their employability. Partnering with government institutions lies at the core of the MPC model, the number of which continues to grow as the programme looks forward to expanding its scope and domains of training in the future.

In 2018, MPC also introduced an innovative, tech-enabled job drive, known as Job Utsav. A total of 42 Job Utsavs have been conducted since, each recording a footfall of over 10,000 students and participation of over 100 potential employers. In the last financial year (2019-20), the programme overcame the challenges imposed by the COVID-lockdown by moving the training entirely online and ensuring that over 40,000 students were skilled.

### **Regenerative Agriculture Skilling Program for Youth**

Students, especially from the underserved rural and semi-urban areas, are at the centre of reverse migration due to Covid-19. With many now being back in their rural communities venturing into agriculture to support their families, or even otherwise, there arises an opportunity to skill and train them. With very little cohesive information available on regenerative agriculture, students and youth might feel comfortable continuing with conventional chemical farming practices that hamper personal, plant, soil and planet health. In addition to this, the United Nations 'Future of Jobs Report 2020' also finds that in contrast to previous years, job creation is slowing while job destruction accelerates around the world. In such precarious times,
