### **ACTIVITY REPORT (CHEMISTRY SOFTWARE TRAINING PROGRAMME)**

**Academic Year:** 2018-19  
**Participants count:** 05  
**Date of Activity:** 01-Feb-2019 to 15-Mar-2019  
**Place:** Department of Chemistry  
Narayanrao Kale Smruti Model College, Karanja (Gh.), Dist. Wardha

**Objective (100 words):** As a part of extension activity department of chemistry conducted the 'Chemistry Software Training Programme' for B.Sc. Final year students. ACD/Chem Sketch Freeware is a drawing package that allows the students to draw chemical structures including organics, organometallic and polymers structures. It also includes features such as calculation of molecular properties (e.g., molecular weight, density, molar refractivity etc.), 2D and 3D structure cleaning and viewing, functionality for naming structures (fewer than 50 atoms and 3 rings). Students of SEM VI are participated in the chemistry software training programme. After completion of training students submitted their project reports.

### ACTIVITY REPORT (Soil Health Awareness Program)

Academic Year: 2021-2022

Participants count: 25

Date of Activity: 03-05/03/2022

Place: Chemistry Lab, NKS Model College, Karanja Ghadge

**Objective (100 words):** Soil testing is now an intrinsic part of modern farming in the West, as well as in many developing countries. So we arrange practical demo for soil and water testing under guidance of Gaurav Pethe, Assistant Professor, Department of Chemistry of our college at NSS camp. He gave importance and all detailed information for process of soil and water testing facility at taluka level. Tests primarily focus on the elements in most demand by crops which are supplied by fertilizers: nitrogen (N), phosphorus (P), and potassium (K). Depending upon the soil types, in some regions tests are also conducted for secondary nutrients: calcium (Ca), magnesium (Mg), and sulfur (S). In drier areas, micronutrients such as iron (Fe), zinc (Zn), manganese (Mn), copper (Cu), and boron (B) are often measured, since deficiencies of these elements are more frequently associated with calcareous soils. Farmers are the very important part of society. A farm which is used for farming it has two main parts one is soil and second is water. So it is necessity to check the parameters regarding the soil and water

### ACTIVITY REPORT (Scholarship Awareness Program)

Academic Year: 2019-2020

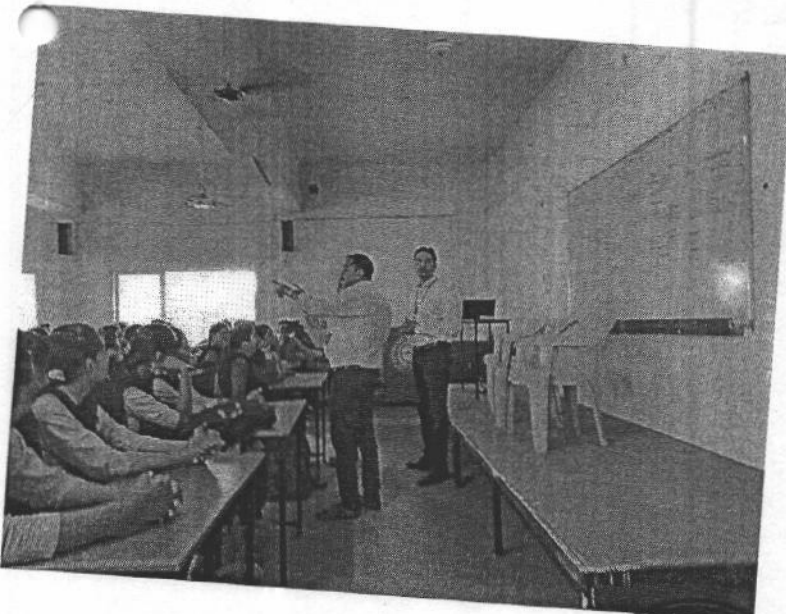

Participants count: 550

Date of Activity: 21-08-2019

Place: Narayanrao Kale Smruti Model College, Karanja Ghadge

**Objective (100 words):** Education has become one of the most valuable and costly things in today's society. Scholarships help students pay for education by providing financial assistance. Obtaining the scholarship eliminates any financial problems. As a result, students will have more time to study, develop information and improve their grade. Keeping the above point in mind, our college organized Scholarship Awareness Program for the students. Mr. Chitrasen Brodarle, Manager, Indian Post Payment Bank, Wardha was the speaker for this program. Mr. Avinash Lohe introduced the speaker and outline of the programme.

### ACTIVITY REPORT (SOIL HEALTH AWARENESS PROGRAM)

Academic Year: 2018-2019

Participants count: 100 (NSS camp)

Date of Activity: 01/02/2019

Place: NSS Camp, Jilha Parishad Prathamk Shala, Junapani, Karanja Ghadge

**Objective (100 words):** Soil testing is now an intrinsic part of modern farming in the west, as well as in many developing countries. So we arrange lecture of Mr. P.D. Madankar, he is Deputy manager, RCF at Wardha. He gave importance and all detailed information for process of soil and water testing facility at taluka level. Tests primarily focus on the elements in most demand by crops which are supplied by fertilizers: nitrogen (N), phosphorus (P), and potassium (K). Depending upon the soil types, in some regions tests are also conducted for secondary nutrients: calcium (Ca), magnesium (Mg), and sulfur (S). In drier areas, micronutrients such as iron (Fe), zinc (Zn), manganese (Mn), copper (Cu), and boron (B) are often measured, since deficiencies of these elements are more frequently associated with calcareous soils. Farmers are the very important part of society. A farm which is used for farming it has two main parts one is soil and second is water. So it is necessity to check the parameters regarding the soil and water
